

ENGINEERING_PRINCIPLES

PineRE Engineering Principle #1

Version: Tartan 0.01

Status: FROZEN

Purpose

This principle defines how discoveries become accepted PineRE knowledge.

Workflow

Observation

↓

Documentation

Freeze

Stage Definitions

Observation

A result is seen or suspected.

Confidence: [UNCERTAIN]

Documentation

The result is written down with evidence and context.

Confidence: [UNCERTAIN]

Reproduction

The result can be achieved again using the same procedure.

Confidence: [LIKELY]

Validation

Evidence confirms the result.

Confidence: [CERTAIN]

Freeze

The result becomes official PineRE knowledge.

Status: [FROZEN]

PineRE Engineering Principle #2

If it cannot be reproduced, it has not been solved.

Formal Adoption

Adopted: Tartan Era

This principle applies to:

- Boot procedures
- DTS changes
- Hardware support
- Build processes
- Documentation
- Release decisions
